With the unique blend of brick, stucco, and stone exterior, this home is one of Drees' classic European designs. A sunroom off the kitchen and breakfast area glistens all day as the sun is able to shine through multiple windows. The stairs are tucked away in the family room, making the first floor very open and spacious. The second floor is an area of well-designed space. A cozy game room that is perfect for entertaining or just relaxing is at the top of the stairs. And the extravagant owner's suite, which features a vaulted ceiling and sitting room, is just down the hall. The additional three bedrooms each have a walk-in closet, plus, there is the convenience of the second floor laundry room.
